

# MULTIWAVELENGTH FIBER-COUPLED LED LIGHT SOURCES

**M**ightex multiwavelength fiber-coupled light sources are enabled by the latest LED technologies and Mightex's proprietary beam combining and coupling optics. Up to eight (8) LEDs are coherently combined into a single multi-mode fiber with the highest efficiency practically possible. Each LED can be powered independently and simultaneously, making the WFC-series a new class of light sources with a tunable spectrum.

The light sources are offered in two configurations: the standard configuration and the high-power configuration. Neutral beam combiners are used in the standard configuration. The standard configuration has the advantage of low cost and the most flexible wavelength plans. Any wavelength and white color may be combined in the standard configuration. For applications that require the highest possible output power, one should choose the high-power configuration where high-efficiency dichroic beam splitters are used to combine different wavelengths. Because not all possible dichroic beamsplitters are in stock, some wavelength combinations may require customization. Please contact us with your detailed wavelength plan to obtain a quotation for custom higher-power configurations.

## FEATURES

- 2, 4, 6, or 8 LEDs combined into a single fiber output
- No moving parts in optical path
- Interchangeable fiber with SMA connector
- Independent and simultaneous control of the LEDs
- High efficiency dichroic beam combiners
- Wide range of available wavelengths: UV/VIS/NIR and white
- Cooling fan for maximum intensity stability
- Optional multi-channel LED controller

## APPLICATIONS

- General purpose light source
- Microscope illuminator
- Fast spectrum tuning

## PERFORMANCE SPECIFICATIONS

<sup>1</sup> Measured with a 400µm-core 0.22 numerical aperture (NA) fiber. Optical output power scales approximately linearly with fiber core area and NA<sup>2</sup>. With a 400µm-core 0.39NA fiber, for example, the output power will be 3.14X of the measured values using a 400µm-core 0.22NA fiber.

<sup>2</sup> Due to variations in the manufacturing process and operating parameters such as temperature and current, the actual output of any given LED may vary. Specifications are intended to be used as a guideline.

## PART NUMBER AND ORDERING INFORMATION

**WFC** -   - **XXXX** - **XXXX** ... **XXXX** - **XXX**

S - Standard configuration H - High-power configuration	Number of wavelengths (2, 4, 6, or 8)	1st wave-length code	2nd wave-length code	8th wave-length code	Internal use
--	--	----------------------	----------------------	----------------------	--------------

For example, WFC-H4-0400-0470-0530-0625-000 is a high-power configuration light source with 4 wavelengths of 400nm, 470nm, 530nm, and 625nm.

With a world-class OEM design team, Mightex offers a broad range of customized solutions in order to meet individual customer's unique requirements. Please call [1-925-218 1885](tel:1-925-218-1885) or email [sales@mightex.com](mailto:sales@mightex.com) for details.

## ORDER NOW

Our primary goal is to help you find the optimal solution for your application. We have a dedicated technical support and sales team committed to providing guidance on our LED illumination and other Mightex products.

Please visit [www.mightexsystems.com](http://www.mightexsystems.com)  
for more information!
